

# UC Publication Management System Deposit Guide

Dear Janice Tsoh,

Making your research publications openly available enables researchers, policy makers, and the public worldwide to read and benefit from immediate and practical information to help address today's problems, inform the community, and inspire future research. UC's Open Access Policies empower researchers to make their scholarly articles freely available to the public in eScholarship, UC's open access repository.

The UC Publication Management System has located publications that appear to be authored or co-authored by you:

[Click Here to Manage Your Publications](#)

32 publications are awaiting your verification, including:

## UC Publication Management

Enables you to

- Manage your publications
- Participate in the UC Open Access Policy
- Increase the impact of your work

Select your campus to get started

UC BERKELEY	UC RIVERSIDE
UC DAVIS	UC SANTA BARBARA
UC IRVINE	UC SANTA CRUZ
UCLA	UC SAN DIEGO
UC MERCED	UCVAX
UPL	UCM UC

Deposit advice

Institutional advice | **SHERPA JOURNALS advice**

If you were a UC employee when you authored this publication, it falls under UC's Open Access Policies

What should I deposit?

**Submitted version / Pre-proof (before peer review)**  
The version of the article you submit to a journal. It may be missing important revisions from the peer review process, but some choose to deposit and make it public before submission.

**Author's final (accepted) version (after peer review)**  
In general, the version to upload. UC's Open Access Policies enable you to upload this version unless your publisher has specifically requested a waiver.

**Published version (branded & formatted PDF)**  
Most publishers do not allow you to deposit the branded version that appears on their own site. Some publishers make exceptions, such as open access publishers.

**Supporting information (supplemental files)**  
Additional documents related to your work. You may upload figures, images, and datasets which will display alongside your article.

Not sure if you have the right version? Check the Sherpa/Journals tab for more advice, read the FAQ for more information, or contact us.

1. Prepare deposit (step 1 of 3)

1 local file has been selected:

AuthorVersion.pdf  
Accepted version

Upload another file | Enter an OA location

2. Add additional information (step 2 of 3)

I would like to specify an embargo

I would like to specify a reuse license

Reuse license:  CC BY-NC

Comment:

Attribution-NonCommercial-CC BY-NC

This Creative Commons license lets others remix, tweak, and build upon your work non-commercially, and although their new works must also acknowledge you and be non-commercial, they don't have to license their derivative works on the same terms.

Thank you

Your publication is deposited.

Do more with this journal article:

[View your publication details](#)

1. The UC Publication Management System regularly searches PubMed, Scopus, Web of Science, Crossref, and other databases for publications that may be yours. Twice a month, it sends you an email if there are any new publications to verify and deposit. Click the link in your email to get started or go directly to [oapolicy.universityofcalifornia.edu](http://oapolicy.universityofcalifornia.edu).

2. Select your UC campus and log in using your campus credentials. If you are a joint appointee of a UC campus and the Lawrence Berkeley Lab, log in using the campus option.

3. You'll be presented with a list of recent publications which may be yours. Use the "Claim" button to verify those you've authored, or the "Reject" button to reject any that are not. A long list is often due to having the same name as another author. (See the next page for tips: *Auto-claim publications and improve search results*)

4. When you claim a publication covered by UC's Open Access Policies, you'll be prompted to:

- Upload a file;
- Provide a link (if the article is already openly available); or
- Claim an existing PDF (if one has been found in a linked open access repository); and
- Add a [Creative Commons reuse licence](#) to specify how you want others to use your work.

Then click to submit.

5. Once your deposit is complete, you are returned to your list of recent publications, in case you need to verify others. You will receive additional email notifications when we discover new publications authored by you.

# Auto-claim publications and improve search results

The UC Publication Management System searches multiple databases for your name variants, affiliation, and other data to find publications which may be yours. If you see more or fewer publications than you'd expect to in your "Pending" list or if the publications listed are inaccurate, **adjust your [Name-based Search settings](#)** used to find publications that may be yours and **connect your personal identifiers**, such as your [ORCID ID](#), to improve results.

## Adjust your [Name-based Search settings](#)

Add the name(s) you publish under to help find your work. The default settings are *Lastname, Firstname* or *Lastname, Initials*. If you have a common name, we recommend using only your full name (e.g. "Zhang, Wei") to help reduce false results. Note: More variants usually increases the number of results.

**Name-based search terms**

Name variants: \*  

(last name first)

Zhang, Wei 

Zhang-Smith, W. 

Specify your current UC institution or previous UC institutions where you were employed. While you can claim earlier publications from other institutions, the open access policies only apply to publications you authored while working for UC.

Addresses:  

University of California Irvine 

University of California San Francisco 

Univ Calif San Francisco 

You can also add the date when you first started publishing scholarly articles at UC.

Start date:

## Connect your personal identifiers

Under [Automatic Claiming](#), confirm your personal identifiers such as your ORCID ID or Scopus Author ID to automatically claim any publications connected to those identifiers now and in the future.

Do these identify you?

We'd like to use these to help clear your pending list, and possibly find more of your items online.

 Scopus ID : 55163436500  
Seen in 11 pending, 0 claimed, 0 rejected, and 34 other publications >

YES NO IGNORE

You may also connect email addresses, profiles, and identifiers by choosing from the options at the bottom of the page.

Add external profiles
